<https://www.naturalnews.com/2022-10-14-lancet-commission-six-reasons-global-response-covid19-colossal-failure.html> **Lancet Commission identifies six major reasons why global response to COVID-19 was colossal failure** ... Per The Epoch Times, the report identified six areas of failure, to include “failures of prevention, failures of rationality, failures of transparency, failures to follow normal public health practice, failures of operational cooperation, and failures of international solidarity.” And because of the failures, the panel concluded, social sustainability objectives were set back years while more than 17.2 million total lives were lost. ... “According to a Harvard Pilgrim study, only 1 percent of adverse effects get reported to the VAERS database. Unfortunately, the warning signs are ignored. The vaccine development continued with more adverse effects occurring,” Dong said. <https://digital.ahrq.gov/ahrq-funded-projects/electronic-support-public-health-vaccine-adverse-event-reporting-system>

<https://expose-news.com/2022/10/14/moderna-is-suing-pfizer-because-they-created-covid-virus/> ... The real reason Moderna is suing Pfizer: **Moderna helped create COVID-19 & patented “Virus” in 2013**; allowing Moderna to develop a COVID Vaccine before world knew COVID-19 even existed ... Moderna had developed the 19 nucleotide gene sequence containing the Furin Cleavage Site which gives Covid-19 its infectivity to humans by patented gain of function research as early as 2013, 6 years before the Wuhan outbreak took place. Not 3 years, as reported in the Mail and virally elsewhere. ... The final codon completed inserted gene sequence, ‘CTCCTCGGCGGGCA’, patented by Moderna, does not exist in natural viruses and neither does the CGG-coded Furin Cleavage site CTCGGCGGGCACGT. ... But they do exist naturally in bacteria and in humans and in cows and in plants. Viruses can invade bacteria and insert their genes into them. But bacteria cannot insert their genes into viruses. Nature has had plenty of opportunities to put them into viruses and has refused to do so. ... Therefore, the only way for bacterial DNA to end up in a virus is by human intervention. So the Covid-19 virus must have been man-made.

<https://expose-news.com/2022/10/15/how-darpa-and-moderna-pioneered-mrna-vaccines/> How DARPA and Moderna pioneered the idea behind mRNA vaccines ... DARPA has openly bragged on Twitter that Moderna’s mRNA vaccine technology, and by extension Moderna’s Covid vaccine, was a product of their ADEPT program. Cationic lipids, like the lipid nanoparticles used in mRNA vaccines, are capable of transfecting basically any type of cell with instructions to make proteins. If the immune system catches a cell producing non-human proteins, some seriously bad things will happen to that cell. Moderna is just another front in

the Biodefence Mafia. ... The introduction of foreign nucleic acids – RNA or DNA – into the body to generate foreign proteins is, by definition, gene therapy, regardless of whether or not the subject’s own genes are changed by it. ... search on nucleic acid vaccines before 2020 ... DARPA openly brag on Twitter that Moderna’s mRNA vaccine technology, and by extension Moderna’s Covid vaccine, was a product of ADEPT ... Corporate media, with few exceptions, are largely silent on this matter. The reason you have been kept in the dark is because you are the target of a globe-spanning military operation, with population reduction, mass surveillance, tyrannical control of people’s movements, and the destruction of human autonomy through implanted technology as its end goal.

<https://en.x-mol.com/paper/article/1347338492243496960> Most tissues of the human body are characterized by highly anisotropic physical properties and biological organization. Hydrogels have been proposed as scaffolding materials to construct artificial tissues due to their water-rich composition, biocompatibility, and tunable properties. However, unmodified hydrogels are typically composed of randomly oriented polymer networks, resulting in homogeneous structures with isotropic properties different from those observed in biological systems. Magnetic materials have been proposed as potential agents to provide hydrogels with the anisotropy required for their use on tissue engineering. Moreover, the intrinsic properties of magnetic nanoparticles enable their use as magnetomechanic remote actuators to control the behavior of the cells encapsulated within the hydrogels under the application of external magnetic fields. In this review, we combine a detailed summary of the main strategies to prepare magnetic nanoparticles showing controlled properties with an analysis of the different approaches available to their incorporation into hydrogels. The application of magnetically responsive nanocomposite hydrogels in the engineering of different tissues is also reviewed.

Pfizer CEO Albert Bourla, around the same time, said his firm was “not certain” if those who receive its mRNA vaccine will be able to transmit COVID-19 to other people. ... Joe Biden in July 2021 remarked that “you’re not going to get COVID if you have these vaccinations.” ... Chief Biden administration medical adviser Anthony Fauci in May 2021 said in a CBS interview that vaccinated people are “dead ends” for COVID-19, suggesting they cannot transmit the virus. “When you get vaccinated, you not only protect your own health and that of the family but also you contribute to the community health by preventing the spread of the virus throughout the community,” Fauci said.

<https://tinyurl.com/35ppz2c2> **The War on Ivermectin** ... EpochTimes ... he outcome could have been much different – and many lives saved – if Big Pharma hadn’t been so successful at suppressing this generic pharmaceutical that was found to work against COVID-19. In his book, “The War on Ivermectin: The Medicine That Saved Millions and Could Have Ended the COVID Pandemic,” Dr. Pierre Kory details the history of ivermectin and the how and why behind Big Pharma’s suppression of this drug when it was found to work against COVID-19

After spending his career as an internist and critical care physician, Kory has now turned his attention to long-haul COVID and post-job injury syndromes

Daily ivermectin use is a mainstay of the treatment plans for long-haulers and those with COVID job injuries, as the drug very effectively binds to the toxic spike protein that is causing most of the damage in both of these conditions

Methylene blue can be helpful for those struggling with crippling fatigue, as it boosts mitochondrial respiration and improves energy metabolism. It’s actually the parent molecule for hydroxychloroquine and chloroquine, off-patent drugs used to treat COVID-19 along with zinc

“The War on Ivermectin” reveals the disinformation playbook used by Big Pharma and its many allies to suppress highly useful and inexpensive medicines in order to protect and increase corporate profits
