

they created the 'American dream'. All major Hollywood movie studios were owned and operated by Jews.

There is a massive amount of literature on the collaboration of the Nazis and Zionists to coordinate emigration of Jews into Palestine. It was called the Haavara. This proves the real intentions of the Jews in WWI and WWII.-- the creation of the State of Israel and ultimately Eretz Israel.

The use of the term antiSemitism is just a treacherous semantic trick to replace the use of the phrase Jew-hatred. In actuality, Jews

are not Semites. 70% of Israeli Jews are Ashkenazi --originating in Europe. Again another Jewish lie. It's use is designed to shut down any conversation on the subject of Jewish deception and perfidy.

HoloHoax

In the academic world, or generally anywhere for that matter, physical evidence must validate theories that can change at any point in time. Nothing is exempt from this except, evidently, the Holocaust. American and European university social science departments that are dominated by Jewish professors and administrators have an impenetrable prohibition

on even the mention of Holocaust research. The slightest consideration of the possibility of this immediately brings a death knell to one's career. This is politics and has no place in the scientific community.

There is absolutely no physical evidence that the supposed Holocaust actually happened. There are no names of any individual identified as being exterminated in a gas chamber. All the supposed evidence is pictures of piles of dead bodies, glasses, cans of Zyklon B ...etc -- can much better explain a typhus epidemic that occurred because of Allied bombing of Axis powers near the end of WWII.

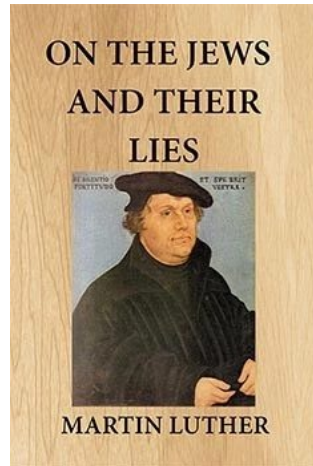

According to the AntiDefamation League, 20-30 percent of the world's population either is skeptical or denies the existence of the 'Holocaust'. This fact in itself warrants should allow any inquiry into the origins and bases for these results. All entities should welcome reviews of their beliefs. To do otherwise invites skepticism.

Disinfection chambers in Dachau. If you were going to exterminate someone you wouldn't bother delousing their clothes to prevent them catching disease. The official holocaust historians and museums also no longer claim anyone was gassed at Dachau. Only lice on clothes were gassed.

There have been countless genocides throughout the history of mankind. For some definite reason, the 'Holocaust' is the only one that has received ad nauseam attention for many decades now. Why is this? Is this not a significant aberration? There

is a credible accusation that the Holocaust false narrative is being used to cover up the misdeeds of Jews. 60 million Christians died in the Bolshevik revolution ... ten times the 'supposed' deaths of Jews in the so-called death camps, but not only is nothing ever reported on this, but there is a concerted effort to cover it up. It is well known that the principal figures of the Communist Revolution were Jewish. Solshynetzin, Putin and many Jewish figures have confirmed this. There's a large museum in Moscow that glorifies this fact. Obviously, it is typical of Jewish leaders to hide this. Martin Luther, in his book, The Jews and There Lies, described this behavior in the 16th Century and it has not stopped. If China is included the number of deaths due to Communism is around 100 million people in the 20th Century.

And what about Holodomor, Stalin's deliberate murder of millions of peasants because they would not submit to Communists plans. This has been erased from history. What about the firebombing of Dresden. Allied atrocities have been completely suppressed in the mainstream western press. It can absolutely be proved that Jewish ownership and control of the MSM is a fact.

And the Ann Frank hoax--buried at the bottom of the Wikipedia page is the fact there her narrative was completely plagiarized and that a \$50,000 settlement was made to remedy this. But again, this is completely covered up by the Jewish controlled MSM.

It is well recognized that the German people in Weimar Germany were deathly afraid of Communism, that Jews were Communists, and that the invasion of Germany was imminent. Hitler was elected on these facts. He and the people of Germany realized that their real enemy was the Jews who had

introduced decadent cultural abnormalities such as pedophilia and incest into their lives. Germans hated Jews because of their behavior, not their ethnicity. This was the era that saw the creation of Cultural Marxism where, because of the lack of success in the Bolshevik revolution, the Frankfurt School was created to institute a Fabianistic alternative. Hitler kicked them

out of Germany and they ended up invading the American academic system, where they shove mass immigration, gender fluidity, pedophilia normalization and Hollywood decadence down the throats of the American people. White male nationalists are their targets. All major Jewish organizations push this 'Progressive' political agendas. George Soros is one of their greatest funders.

The Holocaust was faked and evidence is fabricated. If the evidence is analyzed faithfully, it is shown that the Holocaust narrative was needed to spur Zionist emigration to Palestine in order to create the State of Israel. Orthodox Jews refused to go because of religious beliefs thus ending up in the labor camps and sure death from starvation and Typhus.

The Nuremberg testimonies were extracted via torture or were otherwise faked. Nahum Goldman admitted in his book 'The Jewish Paradox' that the Nuremberg Trials were a creation of Jews who would use it to fund the creation of the State of Israel. The trials had nothing to do with 'justice' and everything to do with extortion.

The 1942 Reigner Memo, supposedly outlining the extermination of the Jews, was not in any way verified, much like the Steele Dossier in the Russiagate hoax. But this did not stop the Jews from orchestrating one of the greatest propaganda campaigns in American history to push the Jewish extermination lie. It was created by Hollywood Jews who boasted that
